During my journey to find a correct method to predict the events merely by Vimsottari Dasha, I have found certain techniques in this Dasha, working on my own Birth Chart. As you all are aware that a Dasha is nothing but the progress of the Moon from his natal point. As per Sayan system, all planets are moving ahead from their natal points at the rate of one day equal to one-year base and forming different angles with other natal planets as well as MC and ASC. In our Vimsottari Dasha we are looking Dasha / Antardasha lords or say Star lord and Sub lords and giving predictions accordingly on the bases of the principles we have studied so far.

In my research of Vimsottari system we have to move Moon in a different way. We will not calculate Dasha / Antardasha but simply see the location of the Moon in progress. How? Here Moon is moving ahead from its natal point, as Dasha progresses. Suppose you are born in Venus Dasha. What does it mean? Your birth is either in Bharani, Poorva Phalguni or Poorva Ashadha star. For example your Moon is at 15° 20' in Aries. This means that Moon has progressed 2 degrees in Bharani as Bharani started from 13° 20' in Aries. I hope everything is clear till this point.

Now, from here we shall have to take help of KP tables. My researched method differs from here. Prof. KS Krishnamurti, the founder of KP System, has shown the 249 divisions of Zodiac and this way he had shown the different zones of the Zodiac for a particular Dasha / Antardasha. This way by referring 249 parts we can immediately locate the zone in the birth chart where our progressed Moon has reached while the particular Dasha or Antardasha is being operated in life.

Please note that my research is not based on KP system or sub theory of KP but the sub zones provided in KP system are much helpful when studying the results of a particular Main or Sub period as will be discussed here. Suppose you are born in Bharani as discussed above and now you are running Sun / Mercury Dasha, we will find in the KP tables that the zone of star lord Sun and sub lord Mercury is shown at no. 26 in Taurus, at no. 109 in Virgo and at no. 192 in Capricorn. This means that when Sun / Mercury period is running, either the zone from 5° 6' 40" to 7° 0' 0" of Taurus or Virgo or Capricorn will be under operation as the case may be coming immediate next from the natal Moon position. Here immediate next zone from natal Moon will be Taurus. So in this case when Sun / Mercury Dasha will be operated, Moon in progress will be between 5° 6' 40" and 7° 0' 0". This is nothing but the progress of our natal Moon from his natal location through different zones of the Zodiac and his different angles with different Planets, MC and ASC.

Suppose a child is born when Moon is in Aries and at the starting point of Bharani star. This means the native will be brought up in Venus Dasha running for 20 years around. All the events coming in the way, the circumstances, the challenges and the opportunities within this 20 years phase will be according to the placement of Bharani star, planets in the Bharani itself and planets in Poorva Phalguni as well as Poorva Ashadha. Venus will be the main ruling planet; so far Moon remains in Bharani. Transit of Venus through different Signs and over different Planets as well

as transit of a planet over natal Venus will make effect on the native during these 20 years phase.

Now suppose Sun / Mercury Dasha is on, we can say that Moon is at Taurus near 6<sup>th</sup> degree. See any planet is there at 6<sup>th</sup> degree anywhere in the Birth Chart? See the angle formed by Moon to that planet. If Saturn is transiting the 6<sup>th</sup> degree of Taurus or it's trine, the native will suffer like anything during this period. Suppose Jupiter is aspecting or crossing this degree, the native will enjoy all good fruits.

I will give some live examples for this. (1) I married during Venus/Mercury Dasha in my Capricorn Ascendant. This Dasha comes at around 25<sup>th</sup> degree in Aries as per KP tables. My natal Jupiter is at 25<sup>th</sup> degree in Sagittarius in 12<sup>th</sup> house. While this Dasha / Antardasha was operated, my natal Moon, the 7<sup>th</sup> lord, came in exact trine to natal Jupiter. Simple, I married. (2) I lost my father when I was running Moon / Saturn period in my Capricorn Ascendant. Why? My progressed Moon was at 16<sup>th</sup> degree at Taurus while Moon / Saturn Dasha was running. On the day, I lost my Father, Saturn was at 16<sup>th</sup> degree at Virgo and Mars also joined Saturn at 15<sup>th</sup> degree. Both were in exact trine to progressed Moon at 16<sup>th</sup> degree in Taurus. A mental shock! (3) I got promotion in Moon / Sun period. Why? My natal Sun is at 22<sup>o</sup> 45' Capricorn. While Moon / Sun period, progressed Moon enters 22<sup>o</sup> 40' at Taurus, exact trine to natal Sun, the planet of power. I could not justify the events in my life as per standard method. Only this system gave satisfaction.

We can move our ASC, MC, Sun and other planets too as per this theory and will get wonderful results. When my progressed MC as per this Dasha progress system was at 22<sup>nd</sup> degree at Scorpio forming 60-degree relation with natal Sun, I was at the top in my professional carrier giving all successful predictions through one leading newspaper of the State. I was honored everywhere at that time.

Man is nothing but a toy in the hands of Time. Time is the only factor in one's life and this Time is decided by only our own planets. That's it !
