

## BIRTH TIME CORRECTION – KP

**Daivagnya Siromani O V N Murthy, M.Com. FCS. DPA.**

KP System of Astrology is based on star lord and sublord theory which has proved successful in predictive astrology. The star lord signifies the macro level and sublord indicates the micro level, the end results whether it is success or failure. The reason is why that many times the conventional astrology does not give a clue to the happening of a particular event but through KP the particular bhava results are taking place through the planet who is connected to Rasi, star lord or sublord of the particular bhava (cusp). Many bhava results are getting modified by the connection of sublord of that cusp. Hence for accurate predictions as per KP System it is inevitable to have the correct time of birth in order to have correct cuspal sublord.

Again for correct time of birth there are number of approaches about the delivery aspects. Normally many have accepted that the first breath and cry of the child is to be taken as the time of birth, which is tallying in many cases. When the birth time was given by somebody, first verify the cusp starlord or sublord whether connected to the birth star of the native.

Invariably the I cusp star and sub should have connection with the birth star of the otherwise try to adjust the birth time by adding or subtracting one one minute to arrive at a correct sub lord of the first cusp. Then you verify the first issue birth star of the native which should tally with 5th cusp, spouse's birth star should tally with 7th cusp, so also second issue birth star. Third issue birth star should tally with the 9th cusp and so on.

Given below is the Chart No.1 who was born in Makha star and 1st cusp sub lord Moon is in Kethu star. First issue was born in birth star of Uttaraphalguni and 5th cusp sublord mercury in Uttaraphalguni. Spouse was born in Aridra Star and 2nd issue was born in Sathabisham star which are tallying with 7th cusp sublord Rahu. Then 3rd conceiving is missed and 4th issue was born in Makha star which is tallying with 11th cusp sublord Kethu. This type of cross tallying of birth star of the native, spouse, first, second and third issues with the relevant cusps would give more satisfaction in arriving the correct time of birth which may need small correction to arrive the correct sublord.

### Nirayana Bhava

Cusp	Rasi	Degree	R-L	N-L	Sub	S-S
1	Gem	5:36:33	Me	Ma	Mo	Mo
2	Can	0:40:45	Mo	Ju	Ma	Ra
