

Corona Virus & KP Astrology

By Rajendra Nimje

Background of problem: Pandemic attack of Corona Virus in the globe. Originating from China and spreading over to Europe and Iran it now has invaded USA and

India. Virus attacked more than 100000 persons in 100 + countries now and death toll has risen to 5000.

In India the Virus has affected more than 70 persons in Kerala, Delhi, Hyderabad, and Jaipur and spreading to other states fast. It is an onset of steep rise for Corona cases in India. WHO has declared the virus has

pandemic meaning having a global spread. GOI has taken serious steps to control the spread of virus being highly contagious disease. State Governments have taken steps by screening patients with symptoms and then quarantine the suspects. The spread of virus is controlled by prompt action of various governments in India. However, the symptoms of Corona virus matches with the symptoms of routine cough and fever and common respiratory problem and it is very difficult to know whether a patient is suffering from pneumonia , Flu , SARS or from Corona virus. The awareness spread on symptoms and precautions are laudable. However, an individual who is suffering from normal cough and cold who is sneezing or coughing continuously has to be quarantined at home or has to wear masks.

Governments have imposed travel bans, preventing mass gatherings, Shops and malls are empty or closed down, many companies asked their workforce to work from home. In this backdrop it is natural to fear acquiring corona virus which manifests after

couple of day and not immediately. Many of them are approaching astrologers and trying to find out whether the cough and cold they are suffering from is an incubation towards corona virus or it is just another disease which is not as deadly

as Corona. It is natural for them as the symptoms are similar in initial stages and they want to rule out the possibility of Corona virus. Though afraid no one would like to go for screening on their own unless forced to. The fear of quarantine in hospitals is high among such patients.

Astrology is certainly helpful to know whether it is Corona or some other mild virus or no disease at all. We can help mankind who are facing this pandemic having spread over continents and now it is staring to engulf India.

How Astrology can help?

As an Astrologer you have to find out whether your consultant is suffering from Corona Virus or not? How can you give conclusive answer? What are the rules to know whether the suffering is from Corona virus or just ordinary cough and cold as the initial symptoms of both are same? It's a major responsibility and also an opportunity to help mankind. **In such epidemic many die out of fear** even though they are not suffering from the actual disease. There is a need to remove the fear out of the minds of such consulting patients and give them confidence.

Mundane astrology, a branch of astrological sciences which is useful to predict the geographical spread of such epidemic. The duration of epidemic, when can it be fully controlled and the magnitude can be predicted with the application of mundane astrology principles.

However, this article is for helping individuals directly through the principles of KP medical astrology.

Medical Astrology: This branch of astrology is useful to predict the occurrence of disease to an individual, its duration, recovery from the disease, medication, success full or partial etc. Through medical astrology one can also predict if the person suffering can succumb to death or will survive.

Rules of medical astrology:

Whenever Ascendant and Sixth house (Disease) are signified through the Dasa Bhukti and Antara then the person will fall sick is a general principle. Planets in the sixth house, aspects of planets on sixth house and lord of six and the transiting planets aspects on sixth lord and the sixth house in case of natal chart will determine the sickness in general. 6th house is the main house for disease, 8th for

difficulties and danger and 12th for hospitalization. 2nd and 7th are maraka houses and Badhaka is 11th house for movable ascendant, 9th for fixed one and 7th for common ascendant. In order to recover from illness DBA must signify either 5 or 11 or both. It should not connect to maraka and badhaka houses.

Medical astrology also has defined rules on which body part is affected based on the sign on 6th house and which planets are associated with sixth and ascendant.

The Corona Virus: Origin and its infection cycle

The symptoms of this virus are coughing, sneezing, fever and breathing discomfort. This virus enters the body through the nose mouth or eyes and then attaches to cells in the airways that produce a protein called ACE2. The virus origin is in bats.

Virus infects the cells by fusing its oily membrane with membranes of the cell. It then releases RNA. As the infection progresses the cell begins to churn out new spikes and other proteins that will form more copies of corona virus. New copies of the virus are then carried out to

the outer edges of the cell. Each infected cell can release millions of copies of the virus before the cell breaks down and dies. Virus may infect nearby cells or end up in droplets that escape the lungs. The infected person gets fever as the immune system fights to clear the virus. Sometime the immune system overreact and start attacking the lung cells. The lung become obstructed with fluid and dying cells, making it difficult to breathe, sometime leading to acute respiratory distress syndrome. Coughing and sneezing can expel virus laden droplets on nearby people and surfaces when the virus can remain infectious for several hours to days.

Houses and Signs to be considered for Corona

As per the Vedic astrology rules the Third house or **Gemini** signify Right ear, Shoulders, Collar, Hands and the related bones, **Lungs, breath** and blood. Second house or **Taurus** signify Teeth, speech, right eye, **Throat, Larynx, Cerebellum,**

Neck and bones, blood vessels and nerves connecting throat and neck.

Among Planets: Mercury is associated with **Throat, lungs and mouth** and **respiratory** system. **Moon** is connected with Cold and conditions like **pneumonia**. Saturn signifies chronic lung disease among others and **Ketu** indicates **viral infection**. Ketu also signify **epidemic**. **Neptune** signify infectious and **contagious diseases**.

The related constellations for the disease are:

Rohini: Swelling in the neck, **cold, fever**, chest pain.

Mrigasira: **Cold and cough**, urinary infection.

Punarvasu: **Pneumonia, lungs infection**, tuberculosis etc.

Ashlesha: Gastric, **breathing trouble**, indigestion, excitation, cough problem etc.

Hence, for examining the horoscope for suspecting Corona Virus look for the presence of Gemini and Taurus signs and planets Mercury, Ketu, Moon and Neptune connecting with Sixth house and ascendant. Use the constellations on 6th cusp for further refinement.

KP or Krishnamurti paddhati is known for its accuracy, correct predictions and timing of the events. There are clearly defined rules to predict if the person is suffering or not, the causes, duration and the remedial direction. In KP a serious question like whether consulting person is suffering from corona virus cannot be answered from the birth chart. From birth chart KP astrologer can get an indication on the life span and if the running DBA is indicating disease and relief. In order to conclusively deal with a specific disease, KP astrologer must rely on the Horary astrology and can use time chart or KP number chart. The number chart will be more appropriate method. The results are more accurate and to get that KP astrologer must follow some strict rules. The first and foremost is to get KP number correctly from the patient or from nearest relative like father, mother, brother, sister, son, daughter or friend etc. If the number is not taken in its full spirit then the answer will not be correct. Client should give a number between 1 to 249, keeping in mind the question “Whether I am suffering from Corona Virus and when the disease will be cured?” As a KP astrologer you can look at the following link on how to take KP number from client where a video has been posted by me.

<https://www.youtube.com/watch?v=qapCdR7H9JI&t=16s> The second step is Moon Connectivity. If the question is not indicated in the chart then certainly you can't predict the outcome correctly. It will be a matter of chance and you would not like to take that chance for a serious question of health linked with Corona virus. How and why to connect moon is also discussed at length in the following video posted and you can refer to the link

<https://www.youtube.com/watch?v=7mVdYOLA0dw&t=108s>

After obtaining the KP number with correct procedure and after moon reflecting in the casted chart (Through self or its starlord signifying 6th, 8th or 12th houses and Ascendant, 5 or 11) you can proceed in the following way.

KP Astrological Rules for Corona Virus test

1. If 6th cusp sub is in retrograde starlord then the person is not suffering from Corona Virus. Good News!
2. If 6th Cusp sub is in direct starlord but is not signifying 6th or 12th then the person is not suffering from Corona Virus. Good News!
3. If 6th cusp sub is in direct starlord and is signifying 6th then the person is suffering from the Corona Virus. Have additional checks before confirmation
4. If 6th Cusp sub is signifying 6th and 12th then the person is certainly suffering and will be admitted in a hospital. [4th CSL if connected to 3rd also gives confirmation of staying away from his residence]
5. If 6th CSL is signifying 6th or 12th and also signifying 5 or 11 then though suffering from virus the person will certainly recover quickly.
6. If 6th CSL is signifying 6 and 12 and not signifying either 5 or 11 then the person will suffer for a longer period.
7. Examine the DBAs. The bhukti lord and antara lord if signifying only 6 or 12 or both then the problem is more acute. If DBA signify 5 and or 11 then the recovery is possible in this DBA. If only 5 or 11 operate then the recovery is slow. If both are signified then the recovery is fast.
8. The percentage of death in Corona Virus case is extremely low. Hence do not panic. It is almost nil for children and youngster till the age of 20. Chances of fatalities are higher after the age of 60 as the immune system is unable to fight the virus attack and the fatality is around 1 to 2%. If all the conditions of 6th CSL signifying only 6 and 12 and not 5 and 11 then look for connectivity

with 8th. If found then examine the DBA connectivity with Marakas and Badhaka. Unless, all are present the patient will not die.

9. In order to recover from any disease Ascendant has to be strong. It also indicates immunity. The Corona virus is very mild and if immunity is strong then the patient will certainly be able to overcome the disease spread by this novel virus. Look for Ascendant sub lord and if it is connected with 6, 8 or 12 then the immunity will be weak and the recovery will be slow. The person has to undergo longer treatment. If the Ascendant sub is not connected with 6 or 12 or 8 and it is connected with 1 and 3 then the immunity is very strong and the recovery will be very fast.
10. 6th CSL and its starlord should be examined in detail. Are any of these two Mercury, Moon or Ketu? If yes then it gives confirmation that the client is suffering from Corona virus. Further, is Gemini or Taurus rising on the 6th cusp then also it is an indication towards the novel virus.
11. 6th CSL's starlord or 6th house is in star of Rohini, Mrigashira, Punarvasu or Ashlesha then the Virus attack being from Corona is very high otherwise it can be from other infectious disease.
12. Look for the western aspects of Moon and Mercury on sixth cusp or ascendant. Favorable aspects like trine or sextile on 5th or 11th cusp will help in recovery. Favorable aspects on the 6th and 12th cusp will increase the intensity of the issue.
13. Examine the Labhasthana. 11th CSL if connected to 5 and not signifying 6 or 12 then certainly the person will recover from the disease. 11th CSL if fast moving planet and in the movable sign then the recovery will be fast. If the 11th CSL is slow moving then the recovery will take time.

Summary:

1. Corona Virus is declared as Pandemic having a geographical reach over 100+ countries. It has infected over one lakh persons in a span of three months killing more than 5000 persons
2. Though the percentage of death is very low and the chances of recovery is very high, the constant threat of virus through ease of human to human transmission is extremely high.

3. Mundane astrology can throw more light on the geographies and intensity of spread and control of the Corona Virus. However, here we have discussed only KP based prediction of individual cases suffering from symptoms of Corona Virus.
4. KP Number system will certainly help KP astrologer if he follows it step by step without rushing for any quick predictions or results.
5. The prediction based on the rules discussed will give a clear picture to the client whether he is infected with the novel corona virus.
6. Even if the prediction points to hospitalization and recovery then it will help not only the client but his relatives, contacts and friends that he will be quarantined in time to help himself and for others.
7. Epidemic fear kills more than from the disease. Timely astrological help will save many human beings from falling to the fear trap.
8. The rules are precise and simple. Looks for each rule step by step and then only take a final decision. DO NOT RUSH as your prediction is very important for your clients.

Let's address the client's fears on Corona Virus infection quickly and conclusively. Let the mankind have clear divine guidance through you.

Good Luck!
